

Project Proposal

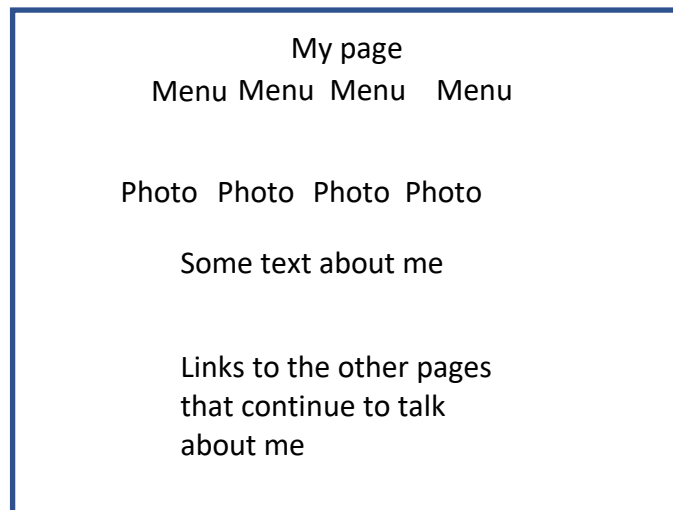

For the Project I'll make a website about me. I'll start the homepage with a carousel of my favorite photos about myself, my family and my hobbies.

Bellow that I'll be writing a little bit about myself. And place some links to the 3 subpages: "Places I've visited", "Professional Experience", "Ask me a question". This links will also be available as a horizontal menu at the top of this page and all three subpages.

On the "Places I've visited" page I'll add two unordered lists, one with the places I've been in the country and another one with the different countries I've visited. I'll add some photos of my trips as well. Finally, on the bottom I'll add a story about a trip on a box that can be scrolled.

On the "Professional Experience" page I'll write the most important things about my professional experience and at the bottom I'll have the option to download my CV and also a link to my LinkedIn.

Finally, on the "Ask me a question" page I'll have a form with one text box so people can write a question they have about me and a submit button to send the form.
